

Co-op Developer

Adaptable | Agile Trained | Database Management (SQL)

HIGHLIGHTS OF SKILLS

- Solid foundation in software engineering fundamentals and the software design process
- Demonstrated capability to deliver quality results in a fast-paced environment
- Strong problem-solving skills with extensive experience with debugger tools
- Skilled in C, C#, Java, JavaScript, Python, SQL, CSS, HTML, XML, PHP, MERN Stack
- Experienced with tools: Microsoft Office, Power BI, GitHub, Visual Studio Code, and Eclipse
- Proven communication and collaboration skills through service-related work experience

EDUCATION

Software Engineering Technology - Artificial Intelligence (Co-op) Advanced Diploma

Centennial College, Scarborough, ON

Sept. 2023 - Present

Courses: Web Application Development | Java Programming | C# Programming | Unix/Linux | Web Interface Design | AI Systems Design | Client-Side Development | Requirements Engineering

SELECT PROJECTS

Developer, 1st Place Prize - Hackathon Competition Participant, February 2026

Mobile Access Technology Centre & TTC - Centennial College Hackathon, Toronto, ON

- Member of a 5-person team that won 1st place in a 3-day hackathon
- Instructed to create a fully modular vending machine that serves healthy and ready-to-go meals
- Contributed to system flow diagram, UML diagram, and the overall design of the data structure

Developer, 1st Place Prize - Hackathon Competition Participant, September 2026

Mobile Access Technology Centre & TTC - Centennial College Hackathon, Toronto, ON

- Member of a 5-person team that won 1st place in a 3-day hackathon
- Designed an electrical nerve stimulation device to treat pressure points on the inner wrist.
- Incorporated AI features in a mobile app for onboarding assistance, rhythm personalization, and session recommendation.

Hotel Database Management System(Oracle SQL)

- Designed and deployed a secure, high-performance relational database in Oracle for a hotel management system supporting online customer bookings and historical purchase tracking.
- Implemented strict database normalization up to third normal form and business-level constraints
- Developed complex SQL queries to handle multi-table joins and aggregation for past client reservation references.

Web Application - *Slingshot Strike*

- Physics-based pinball RPG that mixes with slingshot mechanics
- Designed a responsive user interface with CSS Flexbox and animation to track enemy health bars and special abilities
- Engineered custom 2D collision detection and slingshot mechanics using JavaScript mathematics to calculate angles, ricochet trajectories, and velocity friction

Yiming (Daniel) Ding

[GitHub](#)

Scarborough, ON • 416-569-7051

dding8@my.centennialcollege.ca

C# Text-Based RPG

- Designed and implemented an OOP structure utilizing encapsulation, inheritance, and polymorphism to manage game entities such as player, items, and enemies
- Engineered algorithmic mechanics: damage calculation, random loot drops, surprise encounters
- Used JSON serialization to save and load player profiles, game progress, and item databases

PROFESSIONAL DEVELOPMENT

Foundations - Web Development | The Odin Project (Online) Sep. 2026

Full Stack JavaScript | The Odin Project (Online) In Progress

CS50x - Intro to Computer Science | Harvard - edX (online) In Progress

WORK EXPERIENCE

Accounts Payable Specialist | WholeBrand Food Management, Toronto, ON Jul. 2026 - Present

- Manage more than 150 monthly purchase orders and supplier invoices, efficiently generating accurate invoices to mitigate pricing and quantity errors
- Executed three-way examination between purchase orders, invoices, and receiving records to identify any errors before payment authorization
- Collaborated with the warehouse team to verify proof of delivery for purchase orders to minimize end-of-month errors

Sous Chef | The Pangea, Scarborough, ON Sep. 2024 - May 2026

- Demonstrate leadership skills with 6 other members in a high-volume and high-intensity setting
- Consistently follow standardized prep procedures and inventory tracking
- Cross-trained in multiple stations such as grill, wok, and fry stations
- Prepare food with strong standards, such as hand hygiene and the FIFO principle
